

Polling boundaries of 2007 MMP referendum for Toronto-Centre. Polling areas are coloured according to MMP support. Hence, the stronger the colouring, the stronger the likelihood of finding a household with supporter of PR. About 7% of polling areas are missing data due to merge errors, which can be corrected with further labour. All polls included after merge errors, even those with a small number of voters. Top 10 polls with more than 25 voters are labelled by their rank for MMP support.
